

Zemesarajs R., Gedrovics J. Criteria and Priorities of Occupations' Choice in Different Regions of Latvia.- In: Scientific Proceedings of Riga Technical college. – Riga: 2006, pp.69-76. [In Latvian].

Abstract.

Criteria and Priorities of Occupations' Choice in Different Regions of Latvia by 15 years old scholars of Latvia from the International comparing research ROSE are analyzed in the article. It was find out that in common priorities in all regions are the same. Much attention respondent's pay to professions, connected with personal development, spare time, and factors from the group "authority and fame". Less attention is paid to hand work and Environment. Girls willingly would like to have a work connected with art, boys prefer work with technologies. The research confirms that occupations' choice still depends on respondents' sex. Latvian results in ROSE project confirm affinity with those in neighboring countries.
